

REMARKS

Claims 1-6 are all the claims pending in the application.

In response to the Examiner's final rejection, Applicants submitted substantive reasons for the patentability of the claims over the prior art. In an Advisory Action dated September 23, 2004, the Examiner states that Applicant's arguments regarding the 103 rejections using the combination of Riyuuou in view of Suzuki are not persuasive and that the rejection is maintained.

In order to advance the prosecution of the present application, Applicants are further amending claim 1 to state that the image shown by the virtual telescope in one satellite terminal is different from the image shown in another terminal. Moreover, Applicants continue to maintain that neither Suzuki nor Riyuuou teaches the required virtual telescope as required in the instant invention. While the Examiner asserts that Suzuki teaches terminals that can serve to display a variety of the game images, with reference to column 3, lines 25-39, Applicants further submit that there is no teaching that images would be different as among terminals, related to the position of the viewing.

Support for this feature is provided at least in Fig. 6 and the description beginning at page 10. No new matter is added.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.

Amendment under 37 C.F.R. § 1.114
Application No. 10/036,440

The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account.

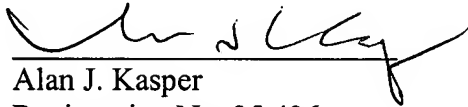

Respectfully submitted,
